-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 02 November 2005.

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 02 November 2005 has been entered.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Messing et al (U.S. Patent Application Publication 2002/0193237 A1).

Art Unit: 1732

Messing et al (see the entire document, in particular, paragraphs [0014] and [0015]; claim 24) teach a process including the steps of measuring (or using) a portion of a geological substance (i.e., a substance that is mined (or removed) from the earth), measuring (or using) a volume of a binding solution, combining the portion and the volume to form a mixture and grinding the mixture. Messing et al do not explicitly use the term "homogenizing"; however, this is inherent in Messing et al principally because Messing et al teach the same steps as recited in the instant claims.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Messing et al (U.S. Patent Application Publication 2002/0193237 A1).

Messing et al (see the entire document, in particular, paragraphs [0014] and [0015]; claim 24) teach a process

including the steps of measuring (or using) a portion of a geological substance (i.e., a substance that is mined (or removed) from the earth), measuring (or using) a volume of a binding solution, combining the portion and the volume to form a mixture and grinding the mixture. Messing et al do not explicitly use the term "homogenizing"; however, this would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of Messing et al principally because Messing et al teach the same steps as recited in the instant claims.

#### ***Allowable Subject Matter***

6. Claims 1-9, 12-55 and 57-68 are allowable over the prior art references presently of record.

#### ***Conclusion***
